

VSL is a solution network organized around locally-based subsidiaries providing modern and cost-effective construction technologies, which are developed and updated by centralized expert R&D and technical teams.

The quality of our highly experienced multicultural staff is our main strength. Our Marketing Staff is dedicated to listen and understand our client's needs and to prepare customized solutions for their projects. We develop new ways of continuously training our experts through e-learning, video learning and annual workshops where we present our new products, equipment and techniques. We also stimulate knowledge-sharing through our extranet which contains reference material, management tools and a dedicated forum where ideas about best practices are exchanged.
